THE ULTIMATE CHOICE OF

# LUXURIOUS BATHROOM

Luxury knows no limit. It is not confined to the wheels. we drive or to our drawing rooms and bedrooms. It has also reached the bathrooms.

We believe that where all the major aspects of our lives are governed by technology, why leave bathrooms behind? Hence, we bring in use, the latest technologies to bring together all these products. The final result, i.e. our bathroom products, displays the use of advanced German technology.

# TECHNICAL SPECIFICATION

## TOILET BOWL WITHOUT AN EDGE

The rimless design is standard for all toilets. It means that the toilet bowls do not have any difficult-to-reach places in which dirt and bacteria can accumulate. This makes it possible to clean the toilet far more quickly, easily and thoroughly. Sonferry has produced rimless toilet bowls since 2018, and has already sold over eight million of them around the world.

## ONE PIECE TOILET

1. If the wall is going to be plastered for a thickness of 12 mm and a tile thickness of 6-7 mm, the projection of the bolts from the finished wall should be 66 mm only.
2. If the thickness of plastering and tile is less than the dimensions mentioned above, the bolts that are supplied along with the bracket should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.
3. The bracket should be buried into the floor so that the height from the center line of the bolt to the surface of the finished floor is 320mm.

ONE-PIECE TOILETS are able to be installed in bathrooms with less square footage since they are lower to the floor they are easier to keep clean. As with most equipment, the fewer separate parts that comprise it, the more durable it proves to be. Installing a ONE-PIECE TOILET is generally easier.
